1. What You Can Win

Registration Benefits — For All Participants

Track tool	Credit Allocation
CodeBuddy/WorkBuddy	2,000 credits / person
Miora	1000 credits / person*

* Miora credits are automatically credited on new sign up as welcome credits

Regional Awards

After the Preliminary rounds, the top 5 teams from each track will compete head-to-head in Singapore.

Award	Prize (WorkBuddy/CodeBuddy/Miora)
Animation Track Top 5	5,000 Miora Credits
AI Agent & Game Track Top 3	30,000 CodeBuddy/WorkBuddy Credits

Grand Finals Awards

The Winner of each track in Singapore will be **invited to Shenzhen for the grand finals, with flights and accommodation covered**, where they will compete alongside other builders from across the globe for the ultimate championship and generous prizes.

Prize Tier	No. of Winners	Prize
Grand Prize	1	Cash ¥100,000
Second Prize	3	Cash ¥50,000
Third Prize	5	Cash ¥20,000
Excellence Award	6	Cash ¥10,000

Exclusive Perks

Perk	Description
Internship Fast Track	Direct access to Tencent IEG & CSIG internship final interviews
Project Promotion Support	Outstanding works are fast-tracked into the 2026 Tencent Game Creation Contest, with opportunities for investment/publishing connections and dedicated project incubation support
Official Certification	Tencent Cloud official certification certificate, including a unique online traceable code and verification portal

Expected Hackathon Timeline*

Phase	Date	Event
Kick-off	July 2	Registration Opens
Hacking	July 10 – August 2	Development & Training
Shortlisting	August 3	Submission deadline
Announcement	August 7	Finalist announcement
Demo Day	August 16	Singapore Demo Day
Grand Final	September	Tencent Cloud Hackathon Grand Final

*Registration opens on a rolling basis, dates are subjected to change, and more information will be announced in the discord channel

2. Event Overview

AI CAN DO IT | Tencent Cloud Hackathon-“Age Well” Social Good Challenge Singapore is now officially launched!

Co-hosted by Tencent Cloud, Tencent Institute of Games, Tencent WeTech Academy, and Tencent Interactive Entertainment Group (IEG) Social Value Exploration Center and is organized by the SMU AI Club.

This is an AI-driven creation challenge open to developers from universities and colleges worldwide. Whether you are a programmer who thrives on elegant architectures, a designer with a keen eye for aesthetics, or a creative producer who orchestrates vision into reality—if you are passionate about the convergence of games, animation, and artificial intelligence, this is your stage. We welcome bold ideas, diverse perspectives, and the courage to reimagine what aging can mean in the 21st century.

3. Challenge Theme

Theme: Age Well

What Does It Mean to “Age Well”?

“Age Well” is not merely about adding years to life, but about adding life to years and broadening the width and warmth of living. It means that every older adult, in the community they call home, can always count on security, independence, dignity, and a sense of purpose.

It calls for a living environment that adapts to changing mobility, a neighborhood network that sustains social bonds, and smart technologies that enable rather than exclude. It elevates the traditional ideal of “being cared for in old age” into a new vision of “contributing, engaging, and thriving” — where growing older is not a retreat from life, but a continuation of it, on one’s own terms.

Why Singapore?

Singapore is ageing faster than any other nation on Earth. By 2030, nearly one in four citizens will be aged 65 and above. “Ageing Well” is no longer just a policy ideal, it is a national strategy. This is not only a pressing social challenge, but also a massive opportunity for innovation.

Why This Hackathon?

We believe technology should serve everyone — not just the young or the tech-savvy. With democratised AI and low-code platforms like Workbuddy, Miora, and Codebuddy, anyone can now build meaningful solutions.

Whether you are a coder, a designer, or simply someone who cares about our seniors, you have the tools to make a difference.

This is not just a competition. It is a co-creation movement. Every small idea, when powered by purpose and tech, can help a senior stay safe, stay connected, and truly Age Well.

4. Project Requirements

We highly recommend using [CodeBuddy](#), [WorkBuddy](#), or [Miora](#) – all powered by Tencent Cloud – as the core development tools for all projects. To help you choose the right tool for your track:

1. **Game Track** – use [CodeBuddy](#) for code generation and [Miora](#) for art assets.
2. **AI Agent / Skills Track** – use [WorkBuddy](#) for planning and generation.
3. **Animation Track** – use [Miora](#) for generating art assets.

Here is a quick overview of each tool:

- **CodeBuddy** – An AI-powered coding assistant that integrates deeply into the development workflow, enabling natural-language-driven coding, testing, and deployment tasks.
- **WorkBuddy** – A full-scenario desktop AI agent that understands natural language commands and autonomously executes multi-step complex tasks, such as operating local files.
- **Miora** – An AI-native creative studio that generates production-grade visual assets – including images, videos, 3D elements, and user interfaces – directly from natural language descriptions.

To further support your participation, we will provide free credits for using these tools to help you leverage them at their full potential and achieve outstanding results in the competition.

Finally, for deployment, we suggest using [EdgeOne](#) as your preferred solution.

Project Format

Game (Codebuddy & Miora)

Submission Deliverable	Specifications & Guidelines
Game Web Link	Online demo of the work
Game Demo Video	Showcases core gameplay and AI
Project Introduction Deck (PPT)	Project overview, AI creation description, team info, etc.

AI Agent/Skills (Workbuddy)

Submission Deliverable	Specifications & Guidelines
Web Link or Skill ZIP	Online demo of the work
Project Introduction Deck (PPT)	Project overview, AI creation description, team info, etc.

Animation (Miora)

Submission Deliverable	Specifications & Guidelines
Animated Video	Project link within Miora
Presentation Deck (PPT)	Project overview, AI creation description, team info, etc.

All submitted files must be named using the following format:

[Project Name]-[Deliverable Name]-[Team Name]

5. Competition Format

Participation Flow

Online Registration -> Receive CodeBuddy Credits -> Project Development -> Project Submission

- **Registration:** Participants register through the registration form and join the event community for Q&A and updates.
- **Credit Support:** Upon successful registration and onboarding on discord, participants will receive credits for Tencent Cloud WorkBuddy, CodeBuddy, or Miora, based on their chosen track. These credits can be used for AI-powered development during the project creation process.
- **Submission:** Teams must complete their project within the required timeline and submit the following materials through the designated form:

⚠ After registration closes, all participants are required to join our Discord community and keep an eye on their email inbox to ensure they receive the latest event updates in a timely manner. To join, simply click "Join Server" in Discord and enter this invite link:

<https://discord.gg/5aE7nB78K>

6. Preliminary Judging Mechanism

Projects will be evaluated across the following three dimensions for a total score of 100 points:

Evaluation Dimension	Score	Key Review Focus
Impact & Relevance	30 points	Evaluation criteria include the project's relevance to the "Age Well" theme, the methods used to tackle the underlying issues or to increase public engagement, and the overall scope and profundity of its influence – all of which will be taken into account in the assessment.
Use of AI Tools	40 points	Evaluation criteria include the effectiveness of AI tool usage in development and the depth of AI-driven attention to detail – for example, worldbuilding and intelligent NPCs (Game Track), autonomous planning and tool invocation (AI Agent Track), and visual asset generation (Animation Track).
Project Quality	30 points	Evaluation will take into account the completeness, interactivity, creativity, technical execution, and overall appeal of your project, among other factors.

Bonus Item

- [Social Media Reach \(+5 points\)](#): Publish the project on social media platforms such as Rednotes, YouTube or Xwith the hashtags [#CodeBuddy](#)[#WorkBuddy](#)[#Miora](#) and [#TencentCloudHackathon](#).

Review Process

Registration -> Preliminary Round -> Project Submission -> Singapore Demo Day
-> Grand Final Review

- 🔥 **Preliminary Round (Online):** We're bringing together the top teams from Singapore's universities. Two online coaching sessions will get everyone up to speed. Judges will evaluate your project on theme alignment, AI tool mastery, and overall quality.
- 🔥 **Singapore Demo Day (Offline) :** The top five from each track secure their spot at the live Demo Day and achieve regional recognition. They'll also compete for regional awards and go head-to-head for the ultimate Grand Final spot.
- 🔥 **Grand Final :** Regional champions face off in an extreme development sprint and a global roadshow. Final winners are decided by a combination of expert judging and public voting – let the best project win.

Your participation is highly anticipated!
